EXPERIENCE

Deloitte, New York, NY

July – August 2019

Information Technology Services Intern

- Prebuilt over 500 machines using Deloitte's standard imaging process in a team of three
- Developed the front end of the graphic user interface for the forms that all users must fill out when requesting help from the Information Technology Services Team, using PowerShell
- Reported 1,000 laptop inventory every week and reconciled as required
- Accomplished personal digital assistant processing of over 200 phone inventory
- Resolved 100 issues pertaining to defective conference room iPads and enabled employees to schedule meetings

AppNexus, New York, NY

July – August 2018

Scaled Services Intern

- Automated the process of collecting case numbers from hundreds of external vendor messages to cut down hours of manual labor by writing a Python script, which the Scaled Services Leads still use today
- Interviewed 10 AppNexians, including the former CEO of AppNexus, Brian O'Kelley
- Audited over 700 creatives to ensure that publishers did not serve undesirable ads on their sites

Brooklyn Technical High School, Brooklyn, NY

Software Engineering Executive Board

October 2018 – June 2019

- Coordinated software engineering activities during Major Course Selection Night and Open House, which 1,500 sophomores and 2,000 prospective students attended, respectively

College Ambassador

February 2018 – June 2019

- Educated 3,000 juniors and seniors about the college application process
- Organized vital school events, such as college tours, Junior Information Night, and Financial Aid Night

PROJECTS

AutoScan – Python, Raspberry Pi

September – December 2019

- Prototyped an automatic page turning scanner that digitizes textbooks and emails the PDF files to users
- Programmed the scanner, PDF converter, email, and user interface
- Designed the company website, auto-scan.github.io

Stock Database – Linux, MySQL, Bash, Python

May 2019

- Constructed a relational database that stored historical stock prices and trading activities of stock tickers
- Executed queries that generated reports on adjusted closing prices of tickers and calculated the total profit and loss of all transactions

Sleep – HTML, CSS, JavaScript, Node.js

June 2018 – April 2019

- Created a web application chosen to be showcased at the New York City Computer Science Fair, which hosted over 2,000 students from 60 schools and over 100 companies, colleges, and extracurricular programs
- Improved the sleep of users through sound/music therapy and spread awareness about insomnia
